DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.
2. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.
3. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 22-25 and 41-49, drawn to nucleic acids coding for human semaphorin 6A-1 comprising the nucleotide sequence shown in SEQ ID NO: 1 and SEQ ID NO: 3, compositions, recombinant vectors, and cell transformed with said nucleic acids comprising same.

Group 2, claim(s) 26-34 and 38-40, drawn to proteins comprising SEQ ID NO: 2 and SEQ ID NO: 4 and compositions comprising same.

Group 3, claim(s) 35-37, drawn to antibodies.

Group 4, claim(s) 50-52, drawn to a method comprising administration of a protein to an animal or a human in an amount effective to modulate differentiation, apoptosis, cytoskeletal stabilization plasticity, or neurite growth.

Group 5, claim(s) 53-56, drawn to a method comprising administration of a nucleic acid to an animal or a human in an amount effective to modulate differentiation, apoptosis, cytoskeletal stabilization plasticity, or neurite growth.

4. According to PCT Rule 13.2, unity of invention exists only when there is a shared same or corresponding special technical feature among the claimed inventions. All the groupings are directed to human semaphoring 6A-1 and uses thereof but each group has a different special technical feature not shared by the remaining groups. Group 1 is directed to nucleic acids, recombinant vectors, and transformed host cells which has the special technical feature of SEQ ID NO: 1 and SEQ ID NO: 3 not shared by any of the remaining groups. Group 2 is directed to proteins and compositions comprising same which has a special technical feature of a SEQ ID NO: 2 and SEQ ID NO: 4 not shared by any of the remaining groups. Group 3 is directed to antibodies which has a special technical feature of an antibody not shared by any of the remaining groups. Group 4 is directed to modulating differentiation, apoptosis, cytoskeletal stabilization plasticity, or neurite growth which has a special technical feature of administering a protein as a therapeutic not shared by any of the remaining groups. Group 5 is directed to modulating differentiation, apoptosis, cytoskeletal stabilization plasticity, or neurite growth which has a special technical feature of gene therapy not shared by any of the remaining groups.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the
